

RELEASE NOTES

Project: StaffBanana

Module: Scheduler

Release Date: January 30, 2025

Release Note Date: January 30, 2025

Overview: This release brings enhanced scheduling features, UI improvements, and bug fixes for a more seamless user experience.

Release Features

- **Schedule Management Actions**
 - Users can now delete and edit schedules, with an improved Modify/Add button when data exists.
- **Position Filter**
 - Added a filter to sort schedules by position.
- **Viewing Filter**
 - A filter to organize the display by Availability, Schedule, or a Combination of both.
- **Total Schedule Hours Calculation**
 - Displays total scheduled hours per week per employee.
- **Employee Availability Settings**
 - Introduced availability settings for employees.
- **Schedule Notes**
 - Added an optional note field for schedules.
- **Availability Details Per Employee**
 - Displays availability details per day per employee.
- **Export Schedule**
 - Export schedules to Excel based on applied filters.
- **Scheduler Dashboard**
 - Default dashboard now displays Total Worked Hours and Total Scheduled Hours.
- **Leave Management (Super Admin Role)**
 - A feature that manages leave types for each company.

Improvements

- **User Feedback Enhancements:**
 - Added a successful pop-up message upon successful copy of last week's schedule.

- Added a successful pop-up message upon successfully clearing the current week's schedule.
- Added a confirmation message before clearing the current week's schedule.
- **UI/UX Enhancements:**
 - **Schedule Validation**
 - Added validation for incorrect data entry in Time In/Time Out fields.
 - Adjusted department field width after cut-off.
- **Time Format Update**
 - Changed the time display to a 12-hour format.
- **Copy Schedule Feature**
 - Users can now copy schedules based on filter adjustments.
